biking, music

experience

2016–Now **C.H. Robinson** Eden Prairie, Minnesota
Software Engineer II January 2018-Now
– Architected and lead the development of the React front-end for a new highly-scaling customer analytics platform.
– Built a complex multi-source user authentication and impersonation flow, developed new patterns using React hooks to reduce the amount of code, and built performant charting and table components utilizing TypeScript generics for displaying a wide range of data.
– Mentored across the company with JavaScript/TypeScript and React.
– Lead developer and publisher for the C.H. Robinson Engineering Blog.
Software Engineer I November 2016-January 2018
– Built new widgets and lead major refactoring for a customer analytics tool to support additional segments of the company and powerful dynamic data filtering application-wide.
– Designed new and rewrote existing screens in an animation-focused data visualization tool for lobby displays leveraging AngularJS, D3, and Bing Maps.

2015–Now **Independent Work** https://github.com/BrianMitchL/weatherBot
weatherBot
A Python-based Twitter bot for weather producing weather forecasts and current conditions. See @WeatherByBrian.

2015 **C.H. Robinson** Eden Prairie, Minnesota
IT Intern
Developed an interactive lobby display illustrating active shipments on an animated world map, built with web technologies for touch-driven hardware.

2014–2015 **University of Minnesota, Morris** Morris, Minnesota
System Administrator
Improved efficiency of and supported the computer science labs. The labs consisted of 30 Fedora workstations managed by Puppet, and using LDAP and NFS.

education

2012–2016 **Bachelor of Arts** Computer Science University of Minnesota, Morris
Focused on Web Development and interpreted languages

2015 **Study Abroad** Danish Institute for Study Abroad, Copenhagen, Denmark
Focused on Danish Language I–II, Artificial Intelligence, and Sustainable Development

other

2019–Now **Co-Organizer** JavaScriptMN Minneapolis, Minnesota
A monthly meetup for JavaScript and related technologies.

2015–Now **Co-Host** PodKit Podcast
A podcast about Apple inclined Web Developers discussing web development and technology in general.
